

UDOT STRUCTURE DESIGN MANUAL**TABLE OF CONTENTS:**

- 1. General Information
 - 1.1 Manual Description
 - 1.1.1 Purpose
 - 1.1.2 Organization & Format
 - 1.1.3 Updates, Procedure, Availability
 - 1.2 The Structures Section
 - 1.2.1 Mission Statement, Goals, etc.
 - 1.2.2 Duties & Responsibilities
 - 1.2.3 Organization
 - 1.3 Design Philosophy
 - 1.3.1 Design Intent
 - 1.3.2 Governing Design Specifications
 - 1.3.3 Design Resources
 - 1.4 Design Procedures
 - 1.4.1 The Design Process
 - 1.4.2 Structure Standards
 - 1.4.3 Design Quality
 - 1.4.4 Design Approvals
 - 1.4.5 Bridge Design Scheduling
 - 1.4.6 Plans
 - 1.4.6.1 Plan Organization and Content
 - 1.4.6.2 Structure Plan Stamping and Signature Policy
 - 1.4.6.3 Shop Drawings
 - 1.4.6.4 Contract Revisions, As-Builts
 - 1.4.7 Design Calculations
 - 1.4.8 End of Project Closeout
 - 1.4.9 Design Information Requirements
 - 1.4.9.1 For Bridge Design
 - 1.4.9.2 For Assigning Structure Numbers
 - 1.4.9.3 For Bridge Inventory
 - 1.4.9.4 Public Disclosure Policy Regarding Bridge Plans
 - 1.5 Coordination with other Divisions & Agencies
 - 1.6 Site Visits
 - 1.7 Consultant Designs
 - 1.8 Local Government Projects
 - 1.9 Design Build Projects
- Appendix 1A: Design Aids
- Appendix 1B: Design Memorandums

2. Design Quality Plan

- 2.0 General
- 2.1 Responsibilities
- 2.2 Design Reviews
- 2.3 Design Approvals
- 2.4 Design Reports
- 2.5 Quality Procedures
- 2.6 Construction Submittals

Appendix 2

3. General Design & Location Features

- 3.1 Definitions and Terminology
 - 3.1.1 Definitions
 - 3.1.2 Bridge Elements
 - 3.1.3 Terminology
- 3.2 Structure Identification
 - 3.2.1 Structure Number
 - A. UDOT_Owned Structures
 - B. Structures Owned By Local Governments
 - C. Structure Number Placement
 - D. UDOT Structures Inventory
 - 3.2.2 Structure Drawing Number
 - 3.2.3 Structure Name
- 3.3 Geometrics
 - 3.3.1 General Criteria
 - 3.3.2 Alignment Geometry
 - 3.3.3 Bridge Superstructure Geometrics
 - A. Bridge Width
 - B. Shoulders On and Under Bridges
 - C. Sidewalks On Bridges
 - D. Cross-slopes on Bridges
 - E. Bridge Widening
 - F. Pedestrian Bridges
 - 3.3.3.1 Cross-slopes on Bridges
 - 3.3.4 Bridge Parapets and Railings
 - 3.3.5 Bridge Undercrossing Geometrics
 - A. Horizontal Clearances
 - B. Vertical Clearances
 - C. Highway Crossings
 - D. Waterway Crossings
 - E. Railroad Crossings
 - F. Construction Clearances
- 3.4 Bridge Aesthetics
 - 3.4.1 Importance of Bridge Aesthetics

3.4.2	The Ten Determinants of Appearance
3.4.3	References
3.5	Preliminary Bridge Plans
3.5.1	General
3.5.2	Concept & Scoping
3.5.3	Bridge Type Selection
A.	Structure Type
B.	Abutment and Bent Locations
C.	Abutment Types
D.	Bent Types
E.	Aesthetics
3.6	Final Structure Design
3.6.1	Governing Design Specifications
3.6.2	Bridge Superstructure
A.	Framing
B.	Diaphragms and Cross-Frames
C.	Graffiti Protection
D.	Expansion and Contraction
E.	Bridge Drainage
F.	Approach Slabs
3.6.3	Bridge Substructure
A.	Bridge Redundancy
B.	Hydraulic Design
3.6.4	Constructability
3.6.5	Inspection and Maintenance Access
3.6.6	Serviceability
3.6.7	Security-Related Requirements
3.6.8	Utilities on Bridges
3.6.9	Bridge Replacement
3.6.10	Bridge Widening
3.6.11	Bridge Rehabilitation
3.6.12	Temporary Bridges and Widening
3.6.13	Retaining Walls
3.6.14	Noise Walls
3.6.15	Overhead Sign Structures
3.7	Design Reports
3.7.1	Bridge Type Selection
3.7.2	Bridge Seismic Strategy
3.7.3	Bridge Load Rating
3.7.4	Bridge Maintenance Plan
3.8	Miscellaneous
Appendix 3A – Design Aids	
Information Required to Design a Structure	
Situation & Layout Checklist (maybe in Detailing Manual)	

Appendix 3B – Sample Plans

- 4. Loads and Loading
 - 4.1 Definitions
 - 4.2 Design Loadings
 - 4.2.1 Limit States
 - 4.2.2 Load Factors and Combinations
 - 4.2.3 Loads and Forces
 - 4.3 Resources

Appendix 4A – Design Aids

- 5. Analysis
 - 5.1 General Considerations
 - 5.1.1 Designer Responsibilities
 - 5.2 Computer Software

- 6. Seismic Design
 - 6.1 Seismic Design Policy
 - 6.2 Seismic Design Criteria
 - 6.3 Seismic Design Strategies
 - 6.4 Seismic Retrofit
 - 6.4.1 Design Criteria
 - 6.4.2 Retrofit Strategies
 - 6.4.3 Repair Strategies

Appendix 6A – Design Aids

Appendix 6B – Design Examples

- 7. Substructure Design
 - 7.1 General Considerations
 - 7.2 Abutments
 - 7.3 Piers
 - 7.4 Footings
 - 7.5 Piles and Piling
 - 7.6 Drilled Shafts
 - 7.7 Seismic Details

Appendix 7A – Design Aids

Appendix 7B – Design Examples

8. Reinforced Concrete Superstructures

- 8.1 General
- 8.2 Materials
- 8.3 Types
- 8.4 Design Methods
- 8.5 Widening
- 8.6 Seismic Details

Appendix 8A – Design Aids

Appendix 8B – Standard Details

9. Prestressed Concrete Superstructures

- 9.1 General
- 9.2 Precast Sections
- 9.3 Precast Girder Bridges
- 9.4 Cast-in-Place Bridges?
- 9.5 Seismic Details

Appendix 9A – Design Aids

Appendix 9B – Standard Girder & Deck Drawings

10. Structural Steel

- 10.1 Design Considerations
- 10.2 Girder Bridges
- 10.3 Design “I” Girders
- 10.4 Plan Details?
- 10.5 Seismic Details
- 10.6 Shop Drawing Review

Appendix 10A – Design Aids

Appendix 10 B – Standard Steel Details

11. Decks & Deck Systems

- 11.1 Deck Protection Systems

12. Accelerated Bridge Construction Elements

13. Miscellaneous Design

13.1 Bridge Details

13.1.1 Bridge Bearings

13.1.2 Bridge Parapets

13.1.2.1 Deck Overhang Design

13.1.2.2 Fence / Railing

13.1.3 Median / Roadside Barrier

13.1.4 Drainage Design

13.1.5 Expansion Joints

13.1.6 Concrete Slope Protection

13.1.7 Utility Attachments to bridges

13.1.8 Bridge Lighting / Electrical

13.1.9 Ladders, Stairs, Grates, etc.

13.1.10 Surface Treatments

13.2 Bridge Widening / Rehabilitation

13.3 Temporary Support Systems for Bridges Damaged by Earthquakes, Impact, Corrosion

13.4 Miscellaneous Highway Structures

Appendix 13A – Design Aids

Appendix 13B – Sample Plans / Details

14. Minor Structures

14.1 Drainage Structures (Culverts & Buried Structures)

14.1.1 General Requirements

14.1.2 CIP Reinforced Concrete Box Culverts

14.1.3 Precast Reinforced Concrete Box Culverts

14.1.4 Three-sided Precast Concrete Structures

14.1.5 Miscellaneous Drainage Structures

14.2 Overhead Sign and Luminaire Supports

14.2.1 General Requirements

14.2.2 Overhead Signs

14.2.2.1 Cantilever Sign Supports

14.2.2.2 Span-type Sign Supports

14.2.2.3 Variable Message Sign Supports

14.2.2.4 Butterfly Sign Supports

14.2.3 High Mast Light Supports

14.3 Retaining Walls

14.3.1 General Requirements

14.3.2 CIP Cantilever Walls

14.3.3 MSE Walls

14.3.4 Other Wall types

14.4 Sound Walls

Appendix 14A – Design Aids

Appendix 14B – Standard Drawings

15. Detailing Practice

15.1 Introduction

15.2 Drafting Standards & Practices

15.3 Structures CADD Standards

15.4 Standard Drawings

15.5 Structures CADD Library

15.6 Quantities

15.7 Guidelines for Preparing Structure Plans

15.7.1 General

15.7.2 Drawing Content & Organization

15.7.3 Bridge Plans

15.7.4 Bridge Widening Plans

15.7.5 Bridge Rehabilitation Plans

15.7.6 Drainage Structure Plans

15.7.7 Overhead Sign Structure Plans

15.7.8 Retaining Wall Plans

Appendix 15A – Detailing Aids

Appendix 15B – Structures CADD Library Details

16. Construction
